WWW.NNEFARO.COM

"It came without generators,
it came without loggers.
It came without towers, tri-banders,
or remote SDR-ers.
Maybe Field Day doesn't come from a large committee. Maybe Field Day perhaps can be just a little bit less."

New England's #1 Field Operators

## About our club

**Northern New England Field Amateur Radio Operators**, or "NNEFARO" was started in the dark days of COVID-19, when the big clubs weren't able to mobilize. So, we decided to undertake some minimalistic activations with a skeleton crew—and the magic started to happen! QRP or QRO, from the mountains to the seashore, or even urban style; New England is a fantastic place to operate from. Thank you for contacting us, we really appreciate it.
